

STRAIGHT DESK

BENDED DESK

Inflation

1. Clean an area, where the desk should be placed. Mainly sharp objects and chemicals have to be removed.
2. Remove desk from the bag and place it to its future position.
3. If the desk is equipped with edge protection cover, remove it before inflation.
4. Check position and function of all valves. There always must be one black (inflation) valve on each internal tube of desk. A base part of black valve must be properly tightened (check a valve seal before use), small black cap must stay open.
5. Inflate desk by connect a hose of pump to the black valve and start inflation. Stop inflation in the moment when tubes are rigid. Do not overpressure!
6. After releasing an inflation hose, do not forget to close and tight the small cap of inflation valve.
7. Place acrylic glass top cover (if equipped) and enjoy your AXION Desk!

Deflation

1. Remove acrylic glass top cover (if equipped).
2. Open inflation valves and hold top desk until desk deflates.
3. Screw all valves back into their position.
4. Place edge protection cover (if equipped).
5. Place desk to the bag.

Note

1. Avoid open flame, sharp objects and chemicals.
Clean by water, technical alcohol and detergent (no aggressive) only! Do not use aggressive dissolvent!
Store dry!
Product is made from 100% polyester and polyurethane bladder.
It can be damaged by rough handling!
2. Do not overpressure!
3. Always screw all valves back into their position after use! Unscrew valves can damage valve bases.
